FLAMMABIL	1
REACTIVITY	0
PPE (Sec.8)	-

Emergency Overview: Product is stable nonflammable powder. If used as intended, the product does not present an acute or chronic health hazard.
Target Organs: Prolonged breathing of high concentrations may cause adverse effects on the respiratory system.
Routes of Exposure: Inhalation, dermal contact, incidental ingestion
Eye contact: Not an irritant. Flush thoroughly with water. Seek Medical attention if irritation persist.
Inhalation: Excessive inhalation may cause irritation of the nose, throat and respiratory tract.
Ingestion: None currently known.
Dermal contact: Not an irritant, not a sensitizer. Wash contaminated areas with soap and water.
Medical Conditions Aggravated By Long-Term Exposure to this |
Respiratory disorders, such as asthma, maybe aggravated by prolonged exposure to high concentrations of this product.
Chronic Effects: If use generates airborne particulates, treats a a NUISANCE PARTICULATE (ACGIH TLV= 10. mg/cu meter)
Signs and symptoms of exposure: Prolonged exposure to dusts of this product may irritate the respiratory system.
Physical Hazard: Not classified as flammable or combustible. It will burn in case of fire. Avoid contact with strong oxidizer.

SECTION 4 FIRST AID MEASURES

Inhalation: Remove to fresh air. Treat any irritation symptomatically. Call a physician if condition persists.
Eye Contact: In case of contact immediately flush with plenty of low pressure water for at least 15 minutes. Remove any contact lenses to ensure thorough flushing.
Skin Contact: Wash well with soap and running water.
Ingestion: Dilute stomach contents with 1-2 glasses of water.
After first aid, get appropriate in-plant paramedic or community medical support if serious signs and symptoms persist.

SECTION 5 FIRE FIGHTING MEASURES

Flash Point: N/A
Flash Point Method: N/A
Burning Rate: N/A
Auto Ignition Temperature: Not Determined
LEL: N/A
UEL: N/A
Flammability Classification: 1 Slight (HMIS, NFPA)
Extinguishing Media: Water spray, dry chemical, foam, carbon dioxide, or halon type extinguishers.
Unusual Fire of Explosion Hazards: May form flammable dust-air mixture.
Hazardous Combustion Products: Carbon monoxide, carbon dioxide, nitrogen oxide and smoke. Under certain conditions some aliphatic aldehydes and carboxylic acids may form.
Fire-Fighting Instructions: Do not release runoff from fire controls methods to sewers or waterways.
Fire-Fighting Equipment: Because fire may produce toxic thermal decomposition products, wear a self-contained breathing apparatus (SCBA) with full facepiece operated in pressure-demand or positive-pressure mode.

SECTION 6 ACCIDENTAL RELEASE MEASURES

Spill / Leak Procedures: N/A
Small Spills: Scoop into a container for disposal, suction up remaining material with a high efficiency vacuum cleaner.
Large Spills: Scoop into a container for disposal, suction up remaining material with a high efficiency vacuum cleaner.
Containment: For large spills, avoid suspending particles, collect for later disposal. Do not release into sewers or waterways.
Cleanup: No special requirements.
Regulatory Requirement: N/A

SECTION 7 HANDLING AND STORAGE

Handling Precautions: Keep containers closed at all times. Avoid creating dust. Keep away from ignition sources.
Storage Requirements: Store in a cool, dry location.
Regulatory Requirement: N/A

SECTION 8 EXPOSURE CONTROLS / PERSONAL PROTECTION

Engineering Controls:
Ventilation: Provide general or local exhaust ventilation systems to maintain airborne concentrations below OSHA PELs (sec.2). Local exhaust ventilation is preferred because it prevents contaminant dispersion into the work area by controlling it at its source.
Administrative Controls:
Respiratory Protection: Seek professional advise prior to respirator selection and use. Follow OSHA respirator regulations (29 CFR 1910.134) and, if necessary, wear a MSHA/NIOSH-approved respirator. Select respirator based on its suitability to provide adequate worker protection for given working conditions, level of airborne contamination, and presence of sufficient oxygen. For emergency or nonroutine operation (cleaning spills, reactor vessels, or storage tanks), wear an SCBA. *Warning! Air-purified respirators do not protect workers in oxygen-deficient atmospheres.*
Protective Clothing/Equipment: Wear chemically protective gloves, boots, aprons, and gauntlets to prevent prolonged or repeated skin contact. Wear protective eyeglasses or chemical safety goggles, per OSHA eye and face protection regulations (29CFR 1910.133). Contact lenses are not eye protective devices. Appropriate protection must be worn instead of, or in conjunction with contact lenses.
Safety Stations: Make emergency eyewash stations and washing facilities available in work area.
Contaminated Equipment: Separate contaminated work clothing from street clothes. Launder before re-use. Remove this material from your shoes and clean personal protective equipment.
Comments: Never eat, drink, or smoke in works areas. Practice good personal hygiene after using this material, especially before eating, drinking, using the toilet, or applying cosmetics.
